IMPORTANT NOTICE

Before proceeding, ensure that both your XRS™ Radio and XRS-BT1-U are updated to the latest version. For detailed instructions on how to upgrade, please refer to the section:

UPGRADING INTERFACE MODULE USING XRS™ CONNECT APP - Page 16.
Failure to update may result in suboptimal performance or compatibility issues.

⚠ WARNING

- **INGESTION HAZARD:** This product contains a button cell or coin battery
- **DEATH** or serious injury can occur if ingested.
- A swallowed button cell or coin battery can cause **Internal Chemical Burns** in as little as **2 hours**.
- **KEEP** new and used batteries **OUT OF REACH of CHILDREN**
- **Seek immediate medical attention** if a battery is suspected to be swallowed or inserted inside any part of the body.

INTRODUCTION

The XRS-BT1-U is an interface module providing full Bluetooth® audio connectivity and wireless PTT (Push-to-Talk) functionality to the full range of XRS™ Connect GMRS Radios.

Bluetooth® audio connectivity allows the XRS-BT1-U to wirelessly connect to an extensive range of third-party audio accessories plus compatible vehicle audio systems, providing users with new and improved ways to stay connected.

The adjustable steering wheel clamp provides a simple mounting solution for the IP67 wireless PTT button and also provides access to the battery without the need to remove from the steering wheel.

FEATURES

KEY FEATURES

- Bluetooth® Wireless Technology – Audio and Data
- Connect to Compatible Bluetooth® Devices
- Wireless Push-to-Talk
- Adjustable Steering Wheel Clamp
- IP67 Ingress Protection (XRS-PTT-U)
- Wired Push-To-Talk Input

IN THE BOX

- Bluetooth® Interface Module + two mounting screws
- Wireless PTT and Steering Wheel Clamp (XRS-PTT-U)
- Pillar Mount Microphone (MC014)
- PTT Dash Mount Kit
- 2mm Silicone Sleeve

INSTALLATION

WIRELESS PTT RANGE

The Wireless PTT Button has a line-of-sight range of around 5 – 7 meters depending on the installation. Range may be reduced slightly if the Interface Module or the Wireless PTT Button is mounted close to metal surfaces. This should not have any noticeable effect on most installations, however, if mounting the remote unit in a bus, motor home or other similar sized vehicle please be aware of the range performance when planning your installation.

WIRELESS PTT MOUNTING

STEERING WHEEL MOUNT

The steering wheel mount clamps onto the steering wheel in a position where the XRS-PTT-U can be easily reached without distraction while driving. Place the XRS-PTT-U into the top clamp, then screw the clamp mount cover. Place the top clamp on the steering wheel at the preferred location and fit the bottom clamp. Secure with the two screws provided. Refer to Page 8 for details.

WARNING: To avoid personal injury, DO NOT install the remote control on any surface associated with your vehicle's airbag.

WIRELESS PTT AND STEERING WHEEL MOUNT

PANEL/DASH MOUNT

The Wireless PTT Button can also be mounted onto a flat surface using the supplied dash mount kit. Mount the Wireless PTT Button in a location that is easy to reach without distraction while driving. **NOTE** - installing onto a metallic surface will reduce the signal range. Refer to Page 11 for details.

WARNING: To avoid personal injury, DO NOT install the remote control on any surface associated with your vehicle's airbag.

INSTALLING THE REMOTE MICROPHONE

The external remote microphone should be installed in a location close to your driving position that will allow it to easily pick up your voice while driving. Suggested areas are the driver's side door pillar, sun visor or roof mounted centre console. Once installed, run the cable to your interface module and plug it into the 3.5mm microphone socket.

Note: Installing the external remote microphone is optional. The radio can be configured to use the original smart microphone (MC66x) with the Wireless PTT Button for hands-free communications if preferred. See 'RADIO MENU OPTIONS'.

External remote microphone mounting suggestions

INSTALLING THE BLUETOOTH INTERFACE MODULE

MAIN WIRING AND CONNECTION

NOTE: The XRS-BT1-U must be connected directly to the XRS™ Connect radio as per the above illustration.

FRONT AND BACK VIEWS

FRONT

3.5mm External Microphone Input

BACK

2.5mm Fixed PTT Input

INTERFACE MODULE

You can choose to fasten the Interface Module with the provided Pan Head Phillips Drive 3Gx8mm screws or with a maximum 4.5mm width zip ties.

XRS-PTT-U STEERING WHEEL CLAMP MOUNT

1. Use a 2.5mm Hex key to loosen the two bolts on Steering Wheel Clamp Mount without removing it.

- 1.1 If the steering wheel has a small diameter OR has soft grips then an additional 2.0mm spacer may be required.

2. Slide XRS-PTT-U onto steering wheel and adjust for preferred location/angle.

3. Use 2.5mm Hex key to hand tighten (do not over torque or use a power driver) two bolts to clamp down the mount. The mount is designed to fit a variety of steering wheel diameters as shown below:

NOTE: The XRS-PTT-U Steering Wheel Clamp is suitable for circular or elliptical shape steering wheel cross-section shapes.

Maximum Diameter

Minimum Diameter

XRS-PTT-U DASH MOUNT

1. Remove adhesive film from Hook Fastener Patch (one with the hole) onto the bottom of the PTT. Ensure slots are unobstructed.

2. Remove adhesive film from Loop Fastener Patch (one without the hole) onto a flat and clean surface.

BATTERY CHANGE

3. Remove Clamp Mount Cap.

4. Remove PTT Button.

6. Use a coin OR a Flat head screw driver (max size 1.2x6.5mm). Do not use other tools as it might damage the slots.

7. Remove PCB. Ensure you are in a dust-free, water-free, and static-free environment to ensure no damage to exposed PCB.

8. Remove and Replace 3V CR2032 coin cell battery.

9. Place PCB with new coin cell into main housing. Use the orientation notch to align pcb in correct position.

Note: These steps are important as it will ensure the unit is IP67 rated/waterproof and that the switch has the correct tactile feel and engagement.

10. Ensure the RED O-Ring is positioned flat onto the battery Lid.

11. Ensure lid is closed correctly and is tightened to the correct torque. The O-Ring should not be visible when correctly tightened.

INSTALLATION TROUBLESHOOTING

- The XRS-PTT-U Tactile button is not engaging after installing a new battery:
 - o Refer to STEP 9 and onwards.
 - o If the PCB is not aligned properly then there will be interference with the button and the PCB.
 - o If the lid is not tightened properly then the button will not engage properly with the switch.
- Cannot open or close XRS-PTT-U battery lid:
 - o Refer to STEP 6.
 - o The coin cell battery is only accessible with a tool; a coin or a (max) 1.2x6.5mm Flat head screw driver.
- XRS-PTT-U Button is rattling in the steering wheel clamp:
 - o Ensure clamp cap is tightened.

PAIRING

HOW TO UTILIZE WIRELESS PTT BUTTON

1. Turn the Bluetooth via the XRS™ microphone.
2. Press the **MENU** button on the MC66x.
3. Select the **BLUETOOTH** setting option from the MC66x menu
4. Select the **VISIBLE DEVICES** option and press and hold the **XRS_PTT** button until you see **XRS_PTT** appear.
5. Select the **XRS_PTT** and select 'Connect'.
6. Then go to the **PAIRED DEVICES** and the **XRS_PTT** should be visible.
 - a. In the same screen, next to the 'XRS_PTT', there should be an asterisk (*) next to the name.

PAIRING BLUETOOTH AUDIO

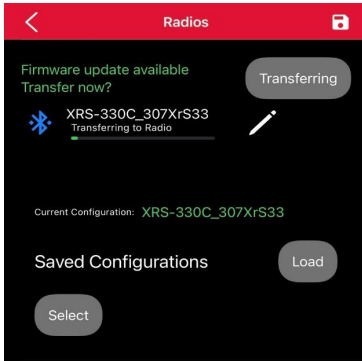

1. Turn the Bluetooth On via the XRS™ microphone and the headset.
2. Press the **MENU** button on the MC66x.
3. Select the **BLUETOOTH** setting option from the MC66x menu.
4. Check the **VISIBLE DEVICES** option to see the Bluetooth device name.
5. Select the required Bluetooth device name and click on **CONNECT**.
6. Then go to the **PAIRED DEVICES** and the Bluetooth device name should be visible.
 - a. In the same screen, next to the Bluetooth device name, there should be an asterisk (*) next to the name as illustrated in the below Figure 4 marked in red circle.
 - b. A Headset symbol  should appear on the top right-hand side of the MC66x main screen as illustrated in the below Figure 4 marked in red circle.

XRS™ CONNECT APP

UPGRADING INTERFACE MODULE USING XRS™ CONNECT APP

For iOS users:

1. Ensure you have the latest update of the XRS™ Connect App which can be found on the App Store.
2. Connect the Radio to the XRS™ Connect App following the pairing procedures of the XRS™ Connect App.
3. Above the connected radio name, the following will appear: "XRS-BT1-U firmware update available. Transfer now?"
4. Click on the "Start transfer" button, next to the above message.
5. A loading bar will appear with "Transferring" button.
6. After the transfer is complete, the radio should automatically reboot and reconnect to the XRS™ Connect App.

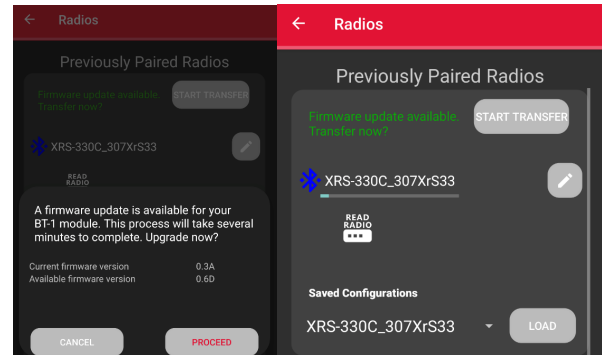

For Android users:

1. Ensure you have the latest update of the XRS™ Connect App which can be found on the Play Store.
2. Connect the Radio to the XRS™ Connect App following the pairing procedures of the XRS™ Connect App.
3. Above the connected radio name, the following will appear: “A Firmware update is available for your BT-1 module. This process will take several minutes to complete. Upgrade now?” it will also display the current firmware version and the available firmware version.
4. Click on the “Proceed” button as shown below.
5. A loading bar will appear with “Transferring” button.
6. After the transfer is complete, the radio should automatically reboot and reconnect to the XRS™ Connect App.

To check the version of your device:

1. Press on the MENU key.
2. Go to Radio Settings option. Using the **▲** or **▼** keys.
3. Go to Versions.
4. Scroll using **▲** or **▼** keys to look for BT1 F/W where the new update number will be displayed.

XRS™ CONNECT APP

The GME XRS™ Connect app is the easy way to customize, update and maintain your XRS™ Connect radio. To download the free XRS™ Connect app for iOS or Android go to the App Store or Google Play and search for ‘XRS™ Connect’.

PAIRING WITH XRS™ CONNECT APP

To pair your Smart Device with your XRS™ Connect radio, open the XRS™ Connect app, select ‘Radios’ from the menu. Locate your radio in the list and press. If a previously paired radio is found it will automatically connect. Your Smart Device will now pair with your radio and the **✱** icon on your radio will change to **[✱]** to show that the Bluetooth pairing is successful.

Once connected, select the 'Read from Radio' button to read your radio's settings into the app. After you have configured your preferences in the app, select 'Write to Radio' to update your radio with your new settings.

NOTE: The Bluetooth® connection between your smart device and your XRS™ Connect radio must be made through the XRS™ Connect app. You will not be able to pair your smart device to your XRS™ Connect radio using the normal Bluetooth settings option on your smart device.

GENERAL OPERATION

RADIO MENU OPTIONS

The Menu provides access to all the settings, adjustments and functions listed in the table below. All menu items are controlled using the MENU, ,  and **BACK** keys.

To access the menu, press the **MENU** key.

To scroll through the list of menu items press the  or  keys.

To select an item, press the **MENU** key.

To step back through the menu, or to exit the current screen, HOLD the **BACK** key.

A context menu is included at the bottom of each screen. The options offered will change depending on the selected topic.

SEL:OPTION = Briefly press the **MENU** key to select the option.

HLD:OPTION = Press and hold the **MENU** key to select the option.

	2. WIRED MIC	2. MC66X/RADIO SPEAKER
	3. MC66X	

MICROPHONE GAIN

The microphone gain controls the sensitivity of the microphone to your voice input level. If you are quietly spoken or are operating in a quiet environment, you can increase the microphone gain to make your voice sound clearer. If your voice is quite loud or you are working in a noisy environment and wish to minimise the amount of background noise that is picked up, you should reduce the microphone gain.

To adjust microphone gain:

1. Press the **MENU** key.
2. Navigate through the menu to select **RADIO SETTINGS > MIC GAIN**, then press the **MENU** key. You can use the **▲** or **▼** key to increase or decrease the microphone gain.

NOTE: The Microphone Gain provides a 'fine' adjustment to the microphone sensitivity. A wider adjustment range is available through the XRS™ Connect App.

To adjust BT1 microphone gain:

1. Press the **MENU** key.
2. Navigate through the menu to select **RADIO SETTINGS > BT1 MIC GAIN**, then press the **MENU** key. You can use the **▲** or **▼** key to increase or decrease the BT1 Microphone gain.

COMPLIANCE

FCC Regulatory Compliance

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RF Exposure Warning

This equipment complies with FCC radiation exposure limits set forth for a uncontrolled environment. This equipment should be installed and operated with minimum distance 0.0 m between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

GME LIMITED WARRANTY AGAINST DEFECTS

This limited warranty against defects is given by GME US Inc., a Wyoming corporation with an address at 2681 N Business Park Ave, Fresno, CA 93727 (We, us, our or GME).

Our contact details are set out below. This warranty statement only applies to GME products purchased in the United States and only to the consumer who originally purchased the product ("you") from GME or an authorized reseller of GME Products. It does not extend to any subsequent owner or other transferee of the product.

Please contact your local GME distributor for products sold outside of the United States. Local distributor details at www.gmeus.com

1.Consumer limited warrantees

This limited warranty gives you specific rights with respect to GME products you have purchased in the United States. You may also have other rights which vary from state to state, as well as through certain retailers. For a full understanding of your rights, you should consult the laws of your state or locality.

OTHER THAN AS INCLUDED HERE, TO THE EXTENT PERMISSIBLE, WE EXCLUDE AND DISCLAIM ALL OTHER CONDITIONS, WARRANTIES AND REMEDIES, WHETHER EXPRESS, IMPLIED, STATUTORY, OR OTHERWISE, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, STATUTORY REMEDY OR OTHERWISE.

2. Warranty against defects

- 2.1 We warrant our goods to be free from defects in materials and workmanship for the warranty period (see warranty table) from the date of original sale (or another period we agree to in writing). Subject to the terms, conditions and requirements set forth below, including with respect to our procedures for making a qualifying warranty claim, we will at our option, either repair or replace goods which we are satisfied are defective. We warrant any replacement parts for the remainder of the period of warranty for the goods into which they are incorporated.
- 2.2 To the extent permitted by law, our sole liability for breach of a condition, warranty or other obligation implied by law is limited
- (a) in the case of goods we supply, to any one of the following as we decide –
 - (i) the replacement of the goods or the supply of equivalent goods;
 - (ii) the repair of the goods;
 - (iii) the cost of repairing the goods or of acquiring equivalent goods;
 - (b) in the case of services we supply, to any one of the following as we decide –
 - (i) the supplying of the services again;
 - (ii) the cost of having the services supplied again.
- 2.3 For repairs outside the warranty period made by an authorised GME representative, we warrant our repairs to be free from defects in materials and workmanship for three months from the date of the original repair. We agree to re-repair or replace (at our option) any materials or workmanship which we are satisfied are defective.
- 2.4 We will investigate any complaint regarding our services made properly and in good faith. If we are satisfied that the complaint is justified, and as our sole liability to you under this warranty (to the extent permitted at law), we agree to supply those services again at no extra charge to you.
- 2.5 To make a warranty claim you must before the end of the applicable warranty period (see warranty table), at your own cost, return the goods you allege are defective.
- Before returning any goods, you will be required to follow the available options:

Contact our Customer Support Team
on (833) 833-3046 or
techsupport@gmeus.com

A customer support team member will troubleshoot and validate if your product is faulty. If so, they will email you a product RMA (Return Material Authorisation).

Products that are authorised to be returned to GME must include the following:

- RMA form, fully completed
- A copy of your proof of purchase
- The faulty product, including all accessories

- 2.6 Send your claim to:

GME US Inc.

2681 N. Business Park Avenue, Fresno,
CA 93727

Telephone: (833) 833-3046

Email: techsupport@gmeus.com

- 2.7 If we determine that your warranty claim is valid, we will pay for the cost of returning the repaired or replaced goods to you and reimburse you for your reasonable expenses of sending your warranty claim to us.

3. What this warranty does not cover

This warranty will not apply in relation to:

- (a) goods modified or altered in any way
- (b) defects and damage caused by use with non GME products
- (c) repairs performed other than by our authorized representatives
- (d) defects or damage resulting from misuse (including use outside of the specifications or requirements applicable to the product), accident, impact or neglect
- (e) goods improperly installed or used in a manner contrary to the relevant instruction manual
- (f) goods where the serial number has been removed or made illegible
- (g) consumable parts, such as batteries or protective coatings that are designed to diminish over time
- (h) defects caused by general wear and tear

IN NO EVENT WILL GME BE LIABLE IN A CLAIM FOR BREACH OF WARRANTY FOR ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES, WHETHER RESULTING FROM THE USE MISUSE OR INABILITY TO USE THIS PRODUCT OR FROM DEFECTS IN THE PRODUCT OR SERVICE. SOME STATES DO NOT ALLOW THE EXCLUSION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS MAY NOT APPLY TO YOU.

4. Warranty period

- 4.1 We provide the following warranty on GME products. No repair or replacement during the warranty period will renew or extend the warranty period past the period from original date of purchase.

PRODUCT TYPE	WARRANTY PERIOD
Interface Module and PTT	3 Years
Accessories	1 Year

Requires **Bluetooth®** 2.1 (Android 8.0 or later) or **Bluetooth®** 4.0 (iOS 15.0 or later).
